Mix Position

- Mix position – 16' x 16' footprint located 90' from down stage edge – centered.
- Audio & Lighting snake run to front of house is approximately 175'. Above ground layout along security fencing.

Town of Cary Sound Ordinance: Booth Amphitheatre restricts audio levels at all events to 95 dBA SPL (measured 100' from the stage). Audio levels are measured & monitored in real-time using a TREND Sound Monitoring Device. Audio levels are measured in 5-minute averages (95db a LEQ) so that artist sound technicians and venue sound technicians can adjust levels as necessary. These five-minute averages are monitored at the mix position in real time with financial penalties assessed if breached. Delay Speaker system grid placed inconspicuously amongst the trees provides balanced and articulated sound for large audiences

Rigging

24 strong points to rig from 2,000 lbs. max per point 48,000 lbs. total grid max load
4 - CM 1-ton Hoists 1 Skjonberg 24-way Control System **When flying the sound system cabinets, we ask that you maintain a bumper trim height of 28 feet off the deck. This trim height and cabinet focus have proven to help benefit our efforts to keep concert audio from reflecting off our Crescent Deck roof.** *Height of Rigging Steel:* Approx. 48' at DSE (Center) to approximately 42'.6" at upstage edge. *Height of Low Ceiling:* Approx. 37'.5" at DSE (Center) to approximately 32' at upstage edge.
Note: Ceiling and rigging steel are not parallel with stage floor

House Lighting

(4) 1.5k Cantos Follow Spotlights on spotlight platforms located approximately 30' from DSE at corners, 47'.5" height (45.2 tower bottom to stage.)

4 - Source 4 26 degrees 10 - Source 4 10 degrees hung from Spot towers 40 - Source 4 Par hung as a single white stage wash
